Below is the cost of publishing your figures in color. The pricing scale is \$350 per figure (see details below). Please enter the figure numbers for all color figures submitted with your accepted manuscript, calculate the total charges, and sign this form. Signature indicates acceptance of the cost of color reproduction. Please return this form as soon as possible, as we cannot proceed with publication of your article until we receive your reply. Please note that any figures submitted in color but not noted on the form will automatically be converted to black and white. Also please note that if a replacement figure is supplied at the page proof stage, the cost to insert a revised 4/C figure is \$350.

FIG. #

COST

_____	\$350	NOTE: (a) If the Corresponding Author is a member of the Protein Society, the first \$350 fee is waived. (b) If all panels to one figure are submitted on one "sheet" of paper, up to 8 1/2" x 11", then there is only one figure fee for this figure. However, if any panel(s) of one figure is submitted on a separate sheet, then each of these panels/sheets constitutes a separate "figure" charge (e.g., Figure 1, panels A and B, would be two figure charges if A and B are submitted on separate sheets; scans are handled one sheet, or "Figure sheet," at a time). Conversely, if Figures 4 and 5 are supplied on one sheet, these are billed as two separate figures because each figure requires its own scan/art proof, as charged by the printer.
